greatest TA ever
very good communication and made everything very accessible. in terms of presenting, can be a bit more engaging
This class was amazing, and the discussions were really insightful. I wish there were more focus on the manufacturing methods of these devices. I think this is the future and I want to learn how to make them.
He would consistently send out resources and create practice materials for us to use and also remind us of the examinations and various concepts. More materials than the large majority of the TAs, showing his dilligence and persistent to increase pedagogy to students.
